Good Days, Bad Days

What's the gloomiest day of the year? It's Blue Monday, the third Monday in January. At this time, it's dark and cold in many countries. The Christmas and New Year celebrations are over. However, scientifically Blue Monday isn't really the saddest day. The company Sky Travel says it's the best day to book a holiday. Making plans for the year on Blue Monday will make you feel more positive. What about the happiest day? People say it's 20th June, or Yellow Day. It's one of the longest days of the year. The sunlight makes people feel energetic. It is also one of the warmest days, but it isn't too hot. The summer has just started and everyone is excited about the summer ahead.
